Summary

Motivated Software Developer and M.Tech Computer Science student with strong skills in Java, Spring Boot, React, MySQL, and REST APIs, seeking an entry-level software engineering role. Skilled in full-stack development, problem-solving, Object-Oriented Programming (OOP), and database management. Eager to contribute to innovative projects and continuously learn modern technologies.

Skills

Languages: Java, Python, SQL, HTML5, CSS3, JavaScript

Databases: MySQL

Backend and Framework: Spring Boot, Hibernate, JDBC, REST APIs, React.js, Bootstrap, Thymeleaf

AI: Machine Learning, NLP, RAG, FAISS, Streamlit

Tools: Git, GitHub, Docker, Maven, Postman, Jira

Soft Skills: Strong Communication, Analytical Thinking, Team Collaboration, Problem Solving

Internship Experience

Software Development Intern

Oct 2023 – Mar 2024

KodNest Technologies (Remote)

- Engineered a music player web application using Java, Spring Boot, MySQL, and Thymeleaf following the MVC architecture.
- Integrated user authentication, role-based access control, and backend functionalities to ensure secure application management.
- Performed debugging, testing, and feature enhancements while collaborating in an Agile development environment.

Web Development Intern

Sep 2023 – Oct 2023

CodSoft (Remote)

- Built responsive web pages using HTML, CSS, JavaScript, and Bootstrap with a focus on cross-device compatibility.
- Enhanced user interfaces by improving website responsiveness, usability, and frontend performance.
- Validated application features through testing, bug fixing, and interface refinement to improve overall quality.

Projects

Student-Sphere | Java, Spring Boot, React, MySQL

- Built a full-stack student management system with secure authentication, role-based access control, and RESTful APIs using Spring Boot and React.
- Implemented student registration, course management, attendance tracking, and result management with MySQL for efficient academic administration.

DocuMind AI | Python, FastAPI, Streamlit, FAISS, Groq LLM

- Developed an AI-powered document assistant that answers questions from PDF documents using Retrieval-Augmented Generation (RAG).
- Integrated FAISS vector search and Groq LLM to retrieve relevant document context and generate accurate, context-aware responses.

San-Eng Translator | Python, Machine Learning, Streamlit, Tesseract OCR

- Developed an AI-powered Sanskrit-to-English translation system in a four-member team using Machine Learning and Tesseract OCR for text and image translation.
- Achieved 97% validation accuracy through data preprocessing and model optimization, with an interactive multilingual interface built using Streamlit.

Certifications

- Oracle Agentic AI Certified Foundations Associate
- Oracle Java Foundation – LinkedIn Learning
- Building with the Claude API – Anthropic Education
- HackerRank SQL (Intermediate)

Education

Master of Engineering in Computer Science

Reva University, Bangalore

Present

Bachelor of Engineering in Computer Science

Canara Engineering College, Mangalore

CGPA: 8.24 / 10

Graduated: 2023

CGPA: 7.25 / 10
